

Brussels is an artistic wall light fixture with an entertaining demeanor. Its design is enigmatic, appearing to be one thing when viewed in one direction, and something else when viewed otherwise. The diagonal fold in the middle gives this product an attractive dual effect on the surface. Have some fun with its various sizes and create patterns of illumination that are intriguing and practical.

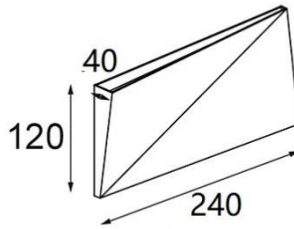

This minimalistic and functional beauty can be used to showcase the two sides of you. Get creative by combining multiple units in different shapes and colors, developing eye-catching patterns. Enhance the wall during the day with this installation and light up the room during the night with a collection of captivating lighting fixtures.

This luminaire features a signature diagonal line which creates a slight indentation, providing the fixture with depth and the illusion of two different tones. This lighting piece is two-sided, allowing for the formation of intriguing artful displays. From squares to rectangles, bigger rectangles to lines, the possibilities are endless.
